

# Examining Slides

A number of tools are available to aid your examination of slides:

- Changing Magnification
- Lateral Scrolling
- Adjusting Image Quality

You can scroll through the entire slide by clicking and dragging on the image in the main viewer window. Alternatively, the following controls are available to assist in your examination of the digital slide:

The **NAVIGATION CONTROLS** allow a user to scroll laterally in the digital slide. The four arrow icons scroll the slide in the X and Y directions. The central button returns the user to a low-power overview image

The **SLIDE OVERVIEW** can also be used to navigate the slide. Users click on a particular region of interest within the overview, and they will be directed to that region in the main viewer. The green box at the centre of the red cross-hair indicates the current field of view

The **MAGNIFICATION CONTROLS** allow users to zoom in and out of the digital slide.
